AI Engineer, Master's in AI (PUC), with experience in identifying problems, developing AI and Machine Learning based solutions, and taking them from prototype to production implementation. Specialized in designing efficient architectures to optimize business processes, with a focus on developing intelligent agents based on LLMs for automation and improvement of decision-making. Certified in AI Agents Fundamentals by Hugging Face.

Work Experience

2024-2025 **DataPulse Agency**

Cofounder:

- Development of Job Scheduling solutions in the mining industry.
- Development of custom agents for internal process support chatbots.
- Construction of dashboards and data pipelines to monitor goal achievement.

2020

Vicepresidency of Projects, CODELCO CHILE

Data Engineer - Control Room Teniente Portfolio:

- Mapping and optimization of data capture processes.
- Integration of field data capture tools (data capture devices and reporting).
- Development of ETL Architecture with Azure.
- Preparation of indicators and reports in Power BI.

2018

D-Proyecta Consultants.

Process Engineer :

- Consulting in process optimization for mining sector companies.
- Implementation of Digital Signature System at CODELCO.

2017

IAS: Health Administration Institute. U. of Chile

Data Engineer: Generation and development of DataWarehouse for internal processes

2016

ECLAC, United Nations.

Consultant: Preparation of policy recommendation documents related to Digital Transformation.

2016

Central Bank of Chile: Macroeconomic Analyst.

Education

- 2025 **Master's in Artificial Intelligence.**
Pontifical Catholic University.
Thesis : "Automatic scheduling of maintenance tasks in mining through Constraint Programming Algorithms" (Highest Distinction).
- 2016 **Commercial Engineering, Major in Economics.**
University of Chile.
Thesis : "Open Source Software and the role of information in production processes"

Additional Training and Others

- 2025 **Certification: "AI Agents Fundamentals".**
Hugging Face. Credential ID: ebravofm.
- 2020 **Publication: "Development Policies: The contribution of business associations to the development of productive policies."**
Co-author, ECLAC Publication.
- 2017 **Diploma: "Data Science and Big Data Analytics: Making Data-Driven Decisions".**
MIT, xPRO platform.
- 2016 **Thesis: "Open Source Software and the role of information in production processes".**
Author, Undergraduate Thesis, Commercial Engineering.
